

ASSIGNED RISK PREMIUM CALCULATOR ENHANCED

The Assigned Risk Premium Calculator is a tool, which allows you to calculate a premium estimation without completing and submitting an entire application to the Facility through OAR. A link for the Assigned Risk Premium Calculator is located in the blue ribbon at the top of the OAR welcome page. You do not need to be logged into OAR to use this tool.

Recent enhancements to the Assigned Risk Premium Calculator include identifying information regarding the employer and automatic population of a modification factor (with some restrictions) based on the employer FEIN. Although the information entered cannot be saved, you can create a report to be saved or printed.

Other enhancements include a help button at the top of the page and action buttons, which allow you to start over, print, search for class codes or go to the OAR home page.

We hope that you will find this updated calculator useful. Please feel free to contact us with any questions or comment.
